## SUMMARY

Proactive and results-oriented Software Developer with hands-on experience in building dynamic, high-performance web applications. Specializes in microservices architecture, RESTful APIs, and modern frontend/backend frameworks. Adept at collaborating within agile teams to deliver innovative solutions that exceed user expectations. Demonstrates a strong ability to adapt quickly to new technologies and solve complex problems effectively. With a proven track record of delivering impactful projects and mentoring team members, I am committed to driving business success through technical expertise and a user-centric approach.

## EDUCATION

**Patika+ 4-month Backend Web Development Program** **Graduation year: 2025**

**BilgeAdam Application Development with HTML, CSS, JavaScript and React.js** **Graduation year: 2021**

- Completed an intensive 200-hour program focused on mastering modern web development technologies, including React.js, with hands-on projects and industry-standard practices.

**Kocaeli University, Kocaeli, Turkey** **Graduation year: 2019**

- Bachelor of Science in Chemistry

## PROFESSIONAL EXPERIENCE

**Intime Info Software Solutions Inc., Istanbul, Turkey** **June 2023 - November 2023**

*Junior Front-End Developer*

- Created frontend components by integrating RESTful web services with Vue.js, Vuetify, and Pinia, and developed dynamic and responsive web applications using Vue Router.
- Extended functionality by integrating third-party Vue libraries and plugins.
- Increased customer satisfaction by 15% by improving the user interface and contributed to code reviews.

**Getir, Istanbul, Turkey** **September 2021 - June 2023**

*Junior Front-End Developer*

- Created front-end using React.js and Next.js frameworks, integrated RESTful web services using Axios, and performed unit and snapshot tests using Jest framework.
- Participated in agile development processes, including sprint planning and daily stand-ups.
- Engineered responsive web designs that ensured seamless user experiences across 10+ mobile devices, achieving compliance with major browser standards and enhancing load times by an average of 30% for end users.

## PROJECTS

**AI Image Generator** **September 2024**

- A platform offering AI-powered image generation, built with modern technologies for a high-performance infrastructure, and delivering a rich user experience.

**AI Chat** **August 2024**

- A platform featuring instant chatbot responses, robust Node.js backend with Ollama, and a user-friendly React interface for a seamless chat experience.

**Timber And Salt** **July 2024**

- An interactive, responsive restaurant website built with Next.js, TypeScript, and Framer Motion, featuring seamless animations and user-centric design.

**Miro Clone** **March 2024**

- A real-time collaborative whiteboard app with drawing tools, sticky notes, and shapes, built with Next.js 14, LiveBlocks, and modern UI styling.

## SKILLS

---

**Programming languages:** C Sharp(C#), .Net, JavaScript, TypeScript, SQL

**Frontend Frameworks:** React.js, Next.js, Vue.js, Tailwind CSS, ShadcnUI, Framer Motion, Styled Components, Ant Design, Vuetify

**Backend Technologies:** Node.js, RESTful APIs, Clerk, Convex, LiveBlocks, Drizzle ORM

**Version Control & Tools:** Git, Docker, Jira

**Design Tools:** Adobe Photoshop, Figma

**Languages:** Turkish (Native), English (Upper Intermediate)
